Research and compilation of climate related policies addressing museums in Europe

Tasks & Targets

- Task:** Identify and compile climate related policies addressing museums in Europe (EU-27) on national, regional and local level.
Target: 27 national policies, 5 regional, 5 local policies addressing museums.
Details: Short summary of each policy and its relation to, and impact on museums in ENG. Policies can be provided in their original language. List of links to relevant policies.
- Task:** Collect good examples of museums from different countries implementing and utilizing those climate policies in their operations.
Target: 5-6 examples from museums from different EU countries.
Details: good examples provided in form of a summary in English plus picture illustrating the example.
- Task:** Set up a practical guide for museums to utilize and implement climate related policies that address them in their museum work.
Target: 2 pages guide with bullet points.
Details: step by step guide that includes practical support broken down in individual steps from identifying to implementing climate policies in your museum.

Limitations & Budget

Currently, not all climate related policies address museums specifically. Where no mention of museums is made, the research can be broadened to cultural heritage and/or culture sector at large. NEMO may add to or adjust the final report as needed. Publication design made separately.

The study should be finalised by **1 September 2023**.

The maximum budget for this research is 3.000,00 Euro (incl. VAT).

Applications

Please send your proposal for the research including methodology, timeline and an estimate for your fee to office@ne-mo.org.

**Deadline for applications:
31 March 2023**

The study should not exceed 50 pages and contain:

An executive summary of the research; a general introduction to the investigated climate policies and how they relate to museums generally; a compilation of climate related policies addressing museums in Europe (EU-27) on national, regional and local level; a compilation of good examples of museums from different countries implementing and utilizing climate policies in their operations; and a practical guide for museums to utilize and implement climate related policies that address them in their museum work.
